Region II  
ATTN: Mr. William Roach  
Federal Facilities Section  
Room 2230  
Jacob K. Javits Federal Bldg  
New York NY 10278

1. Attached is the Plattsburgh Air Force Base (AFB) Installation Restoration Program (IRP) Site SS-033 Action Memorandum for the lead-contaminated soil removal action at the Old Small Arms Range. The Action Memorandum substantiates the need for a "time-critical" removal response at Site SS-033.
2. The preferred removal action alternative addresses the principal threat to Site SS-033 by removing the lead-contaminated soil. The recommended removal action includes the following components:
  - a. Excavation of lead-contaminated soil from the back berm.
  - b. On-site screening solidification and backfilling of contaminated soil.
  - c. Restoration of the site to its original condition.
3. On-site removal activities are scheduled to begin in the fall of 1992 or possibly in the spring of 1993 time frame.
4. Request a timely written concurrence with this document, as soon as possible. If you have questions regarding the Site SS-033 Action Memorandum and/or the planned removal action, please contact Mr. Brady Baker at (518) 565-6672.
